## COVID-19 Exposure in Florence County Establishment

Establishments that are listed here does not mean they did anything wrong nor does it mean the establishment should be closed.

The health department has notified the business prior to listing them. This is not intended to place blame on anyone who tests positive (people may not have symptoms during their period of communicability and may not know they are sick), any local businesses, or other locations identified. It is meant to allow the public to better know their potential risk of being previously exposed to someone who has tested positive.

It is important for everyone to continue to be diligent in the spread of COVID-19 as people without symptoms can spread the virus and may be visiting the same places as you are.

Public Health can confirm that there were positive cases at the following establishment(s). These locations were a low risk exposure.

- Roadhouse 139, Long Lake, WI on August 26-September 3, 2020 11:00am-10:00pm

If you have been at these establishments, monitor your symptoms. If you develop symptoms isolate yourself and call your health care provider.
